Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3611

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 7 and 9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 7 recites a pair of sleeves (i.e. elements 23) that are in sliding contact with said outer and inner tubes. It appears, however, that these sleeves must be in sliding contact with only one of the inner or outer tubes. (e.g. In other words, it appears that these sleeves must be fixed to one of the inner or outer tubes.) If the sleeves are in sliding contact with both the inner and outer tubes, it seems that they would not function properly, and would not stay in the disclosed positions. Clarification and/or correction are required. Applicant is reminded that new matter will not be entered.

Claim 9 recites that the outer tube has a non-circular portion adjacent to the top end of the outer tube. This appears to be incorrect because the non-circular portion of the outer tube must coincide with the top portion of the inner tube 22. As shown in fig. 3, the top end 211 of the outer tube is significantly displaced from the top portion of the inner tube.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 9, line 3, "said top end of said outer tube" lacks antecedent basis.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 2, 7, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukutake '676.

Fukutake teaches a fork unit having the structure as claimed. As shown in fig. 2, the device includes an outer tube 11, a shock absorber 18, an inner tube 5, a resistance providing member 20, sleeves 17/19/21, and non-circular portions 14/15.

7. Claims 1, 2, 3 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Robinson '026.

Robinson teaches a fork unit having the structure as claimed. As shown in fig. 2, the device includes an outer tube 28, a shock absorber 66, an inner tube 30, a resistance providing member 61, and inner top flange 70, and non-circular portions 34/36.

8. Claims 4, 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3611

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chien, Rajae, Browning and Genovese disclose various devices having features in common with the instant invention.

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel G. DePumpo whose telephone number is 703 308-1113. The examiner can normally be reached on Monday - Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lesley Morris can be reached on 703 308 1113. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
